Work Experience

Owner & Founder 2018 - 2019

Ririchiyo Music | Navi Mumbai, India

Ririchiyo, named after an anime character (rebranded to Musical Tune) was a music bot made for a messaging and calling app called Discord. The bot managed to gain over 2 million users in just 1 year after which it was sold to Tunebot.org which rebranded it to Musical Tune. Originally working alone on the entire project, during the later days, I was responsible for managing a team of 6 developers and designers who made this project a huge success.
